

SHAOLIN SAGA

**Private on-chain intelligence.
Lifetime access through 388 NFTs.**

Built for traders, communities, server owners, partners and creators who want live market intelligence without recycled calls.

388 Disciples • One Community

ACCESS / UTILITY DECK

Executive Snapshot

A private Discord ecosystem combining NFT access, live token monitors, wallet tools, Polymarket alerts and anti-scam checks.

388

Limited NFT Supply

Lifetime

Holder Access

Live

Tools Already Running

B2B

Server Rental Model

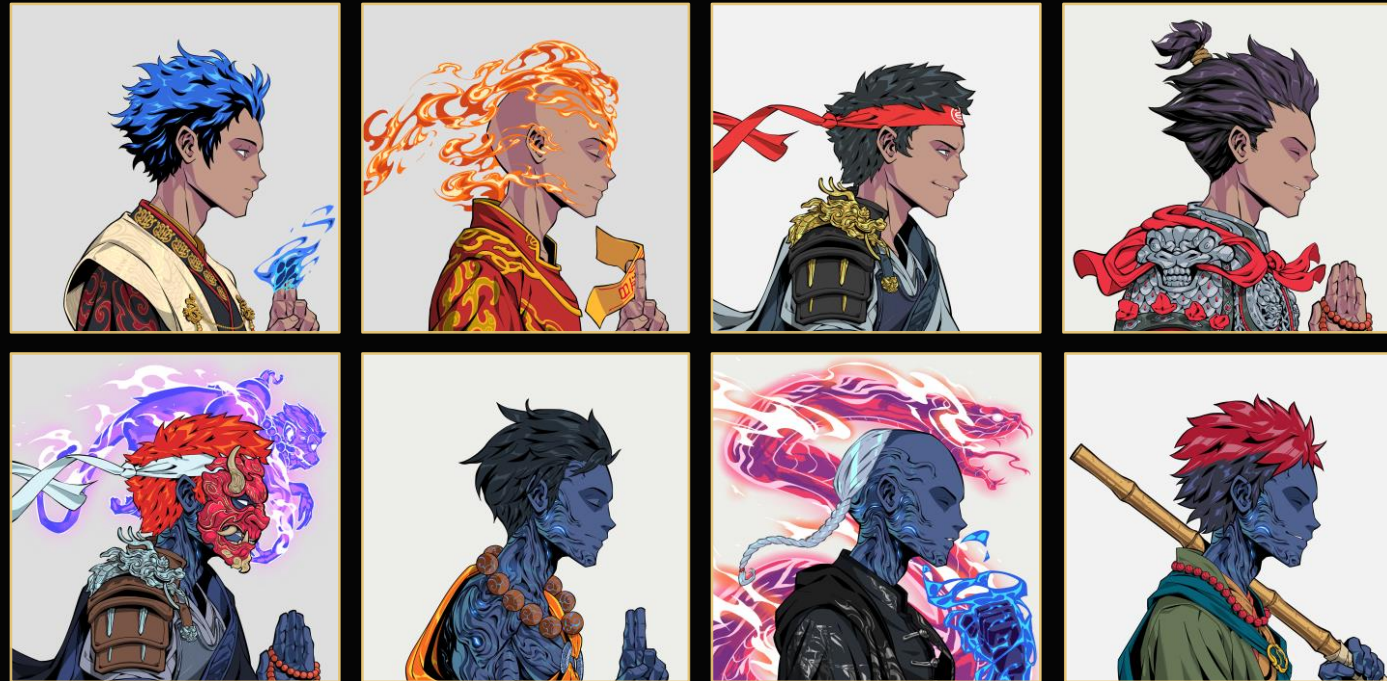

Shaolin Saga is built to generate value beyond the mint — through holder access, paid memberships, server rentals and partner distribution.

Art And Identity

A 388-piece collection built around premium identity, holder access and real utility. Artwork by Apes94.

The Problem

Signals Are Late

Most traders see calls after the early move has already happened. By the time it reaches the timeline, it's often too late.

Data Is Scattered

Token launches, wallets, DEX updates, market shifts and risk checks sit across different tools, tabs and paid services.

Trust Is Thin

Fake accounts, reused images, rushed launches and unknown wallets create risk before a community even gets a clean read.

Shaolin Saga brings the key reads into one private Discord flow.

The Solution

Live market intelligence, packaged inside a private Discord with access controlled by NFT ownership, paid membership, or server rental.

1. Detect

New launches, curve movement, whale trades and high-velocity shifts

2. Verify

Wallet, DEX, image reuse and account history checks before entry

3. Prioritize

Alerts filter noise into useful market reads and watchlists

4. Monetize

NFT access, memberships, server rentals and partner referrals

The value is not one bot. It is the private ecosystem around the tools.

Product Modules

Pump & Bonk Monitors

- All New Tokens Feed
- Bonding Curve Thresholds
- Migration Alerts
- Large Trade Detection
- Based Dev Tracking
- Live Stream Tracking
- Filtered Tokens With 3 Socials
- DEX / Boosted Alerts

Polymarket Monitors

- Volume Surges
- Odds Reversals
- Rapid \$50K+ Moves
- Macro Event Movers
- Resolution Plays
- Crypto Price Consensus Shift
- Airdrop/TGE Intel
- Daily Roundup Posted Every 24 Hours

Wallet / DEX Tools

- Wallet Analyzer
- Top Holder Checks
- Bundle Checks
- DEX Paid Checks
- Market Heatmap

Anti-Scam Checks

- Twitter Reuse Checks
- Reverse Image Search
- Profile History Checks
- Reused Media Detection
- Risk Review Flow

The Practical Result

Members can discover, filter and verify opportunities faster, without depending on recycled calls or manually watching every market.

Access Model

NFT Holders

388 NFTs act as lifetime access passes into the private intelligence ecosystem. Low supply keeps the holder base focused and premium.

Buy here:

<https://www.tensor.trade/trade/shaolinsaga>

Access: Lifetime Holder Access

Paid Members

Non-holders can rent access to try the ecosystem without buying an NFT. This creates a recurring revenue layer outside the mint.

Early Paid Members

7 days: 0.20 SOL

14 days: 0.35 SOL

30 days: 0.5 SOL

Standard monthly access: 0.5 SOL after launch pricing ends.

Server Clients

Other communities can rent selected bots or the full alpha suite, bringing Shaolin Saga intelligence into their own private Discord server.

Commands: 3 SOL / month

Wallet Tracker: 3 SOL / month

Pump & Bonk Signals: 5 SOL / month

Full Alpha Suite: 6 SOL / month

First 5 server clients receive 50% off while their package remains active.

One brand. Three access paths. Multiple revenue channels.

Commercial Model

Primary

A 388-piece holder access collection used to bring approved applicants into the private ecosystem and build the core user base.

Recurring

Weekly, 14-day and monthly memberships for non-holders who want to test the ecosystem before becoming lifetime holders.

B2B Rentals

Server owners can rent commands, wallet trackers, Pump / Bonk signals, or the full alpha suite on a monthly basis.

Partner Layer

Referral payouts, creator partnerships, community deals, affiliate distribution and future bot licensing.

Revenue is not limited to the mint — Shaolin Saga can monetize access, tools, server deployment and distribution.

Why Shaolin Saga Is Different

Utility First

Tools are already live. The NFT is not just art and not a vague future roadmap — it is the access layer to an active product.

Private Ecosystem

The offer combines signals, commands, verification, channels, roles, member access, B2B rental and referrals in one place.

Clean Brand

Strong identity, premium art direction, low supply and a serious tone that avoids hype, spam and empty promises.

No recycled signals. No “100x” claims. Just faster reads, cleaner checks and structured access.

Where Partners Fit

Strategic Partners

Support growth, distribution and infrastructure around a product that is already live.

Best fit for people who can help with reach, capital, creator access, server relationships or strategic introductions.

Server Owners

Rent ready-made market intelligence tools for your own community without building the stack internally.

Add live monitors, wallet tools, alerts and anti-scams checks directly into your Discord.

Creators / Callers

Bring your audience into a serious utility ecosystem built around live reads and verification, not hype.

Earn through referrals, curated access or community-led distribution.

Community Partners

Connect Shaolin Saga with active trading communities, alpha groups and Web3 networks.

Partners can help grow access, introduce qualified users and bring real utility into existing communities.

Every partner route connects back to the same product: live intelligence, private access and deployable tools.

Go-To-Market

Community Launch

- Discord-first product demos
- X thread explaining live tools
- Short-form video across X, IG, TikTok and YouTube
- Holder verification via NFT access

B2B Expansion

- Server owner outreach
- Full alpha suite rental
- Affiliate referral tracking
- Ready-to-deploy bot packages

Trust Layer

- Clear docs and resources
- Low-hype positioning
- Security-aware Discord setup
- Visible utility before purchase

Shaolin Saga is built to generate value beyond the mint — through holder access, paid memberships, server rentals and partner distribution.

The Ask

We are looking for strategic partners, server owners, creators and aligned communities who want to bring real-time market intelligence to their audience.

Partner

Distribution / growth / strategic support

Rent

Deploy bots into your own Discord server

Refer

Earn when a server you introduce becomes a paying client

How To Join

Mint. Hold. Verify. Then Enter The Private Shaolin Saga Ecosystem.

1. Buy

Secure a Shaolin Saga NFT and hold one of 388 lifetime access passes.

2. Verify

Connect through the official verification flow to unlock holder-only channels.

3. Use

Follow live monitors, commands, alerts and risk checks inside the private Discord.
